Primero miraremos la configuración que hemos usaremos para psiphon, en este caso colocamos no proxyficar sitios web del país para que en caso sea del mismo país no pase por el vpn

El VPN Que hemos usado es psiphon

Your IP address revealed to the rest of the world is shown below, and it is also known as the public IF address. You may have an IPv4, an IPv6 or both depending on the connection type. If you're behind a router, the IP address shown below would be your router's IP address and your computer would have received a private IP address from a DHCP server.
