

LABORATORIO 19 Y 20 TECH

JESUS DAVID DE LA HOZ PEÑA

UNIVERSIDAD POPULAR DEL CESAR

VALLEDUPAR

2025

Primero descargamos Kali Linux para eso nos vamos a la pagina
<https://www.kali.org/get-kali/#kali-platforms>

Choose your Kali platform

LIGHT ☒ DARK

Installer Images

- ✓ Direct access to hardware
- ✓ Customized Kali kernel
- ✓ No overhead

Single or multiple boot Kali, giving you complete control over the hardware access (perfect for in-built Wi-Fi and GPU), enabling the best performance.

Recommended

Virtual Machines

- ✓ Snapshots functionality
- ✓ Isolated environment
- ✓ Customized Kali kernel
- ✗ Limited direct access to hardware
- ✗ Higher system requirements

VMware & VirtualBox pre-built images. Allowing for a Kali install without altering the host OS with additional features such as snapshots. Vagrant images for quick spin-up also available.

Recommended

ARM

- ✓ Range of hardware from the leave-behind devices end to high-end modern servers
- ✗ System architecture limits certain packages
- ✗ Not always customized kernel

Mobile

- ✓ Kali layered on Android
- ✓ Kali in your pocket, on the go
- ✓ Mobile interface (compact view)

Cloud

- ✓ Fast deployment
- ✓ Can leverage provider's resources
- ✗ Provider may become costly
- ✗ Not always customized kernel

025.1c/kali-linux-2025.1c-vmware-amd64.7z

Ahora descargamos FileZilla el cual es un programa gratuito y de código abierto que se utiliza principalmente para transferir archivos entre un ordenador local y un servidor remoto a través de protocolos como FTP (File Transfer Protocol)

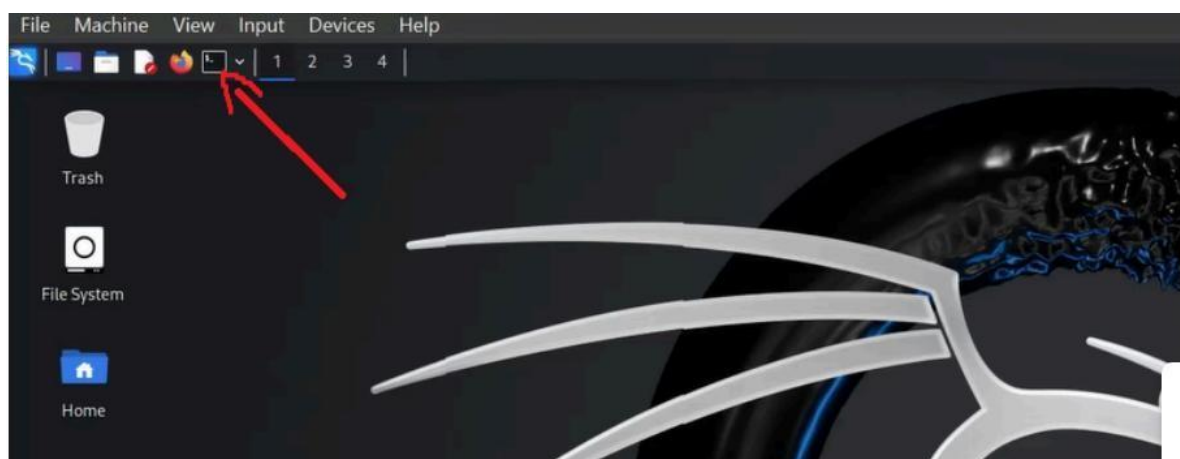

Ahora configuramos el Kali Linux en VirtualBox

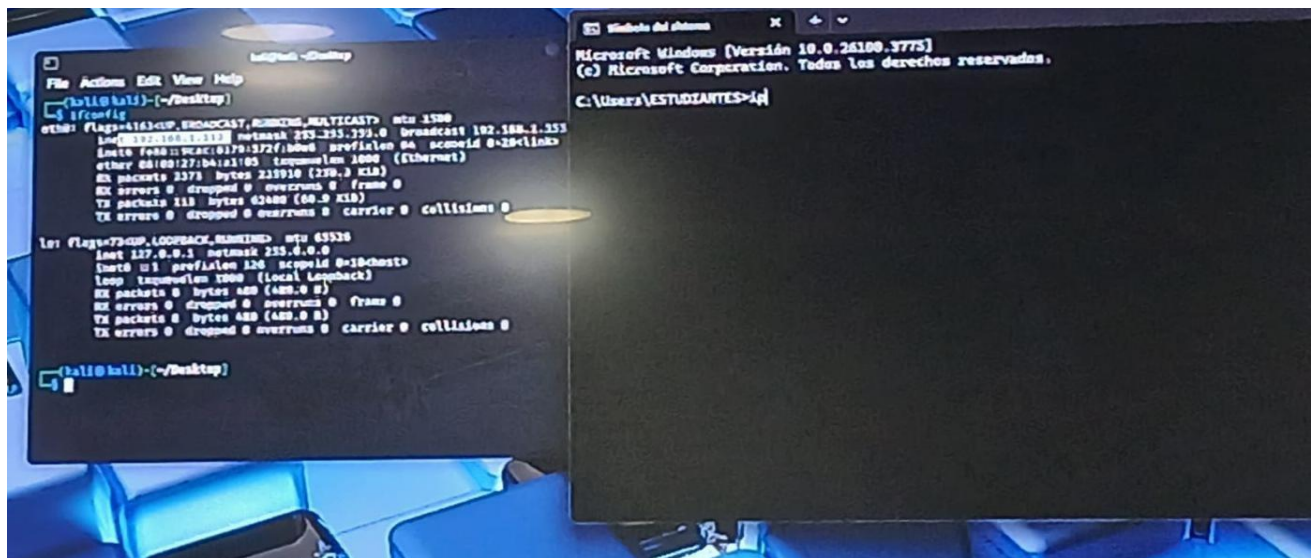

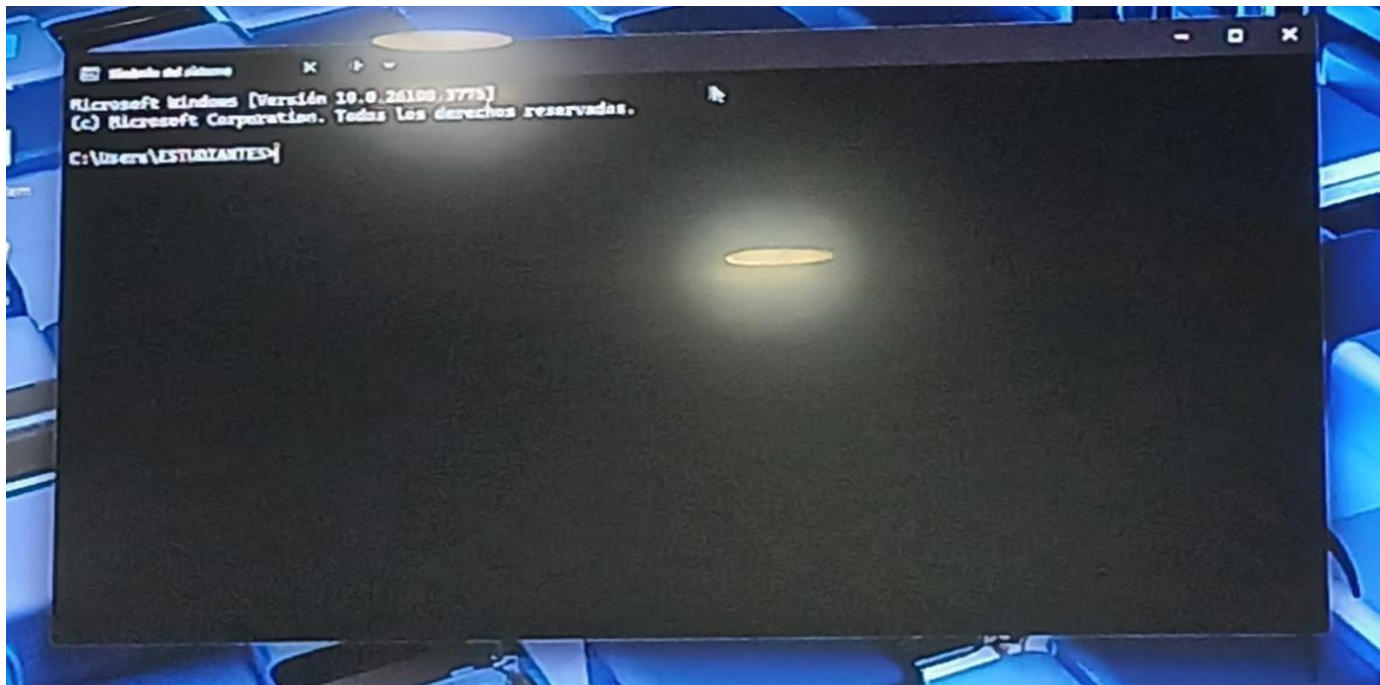

Siguiente paso a este colocamos usuario Kali y contraseña Kali

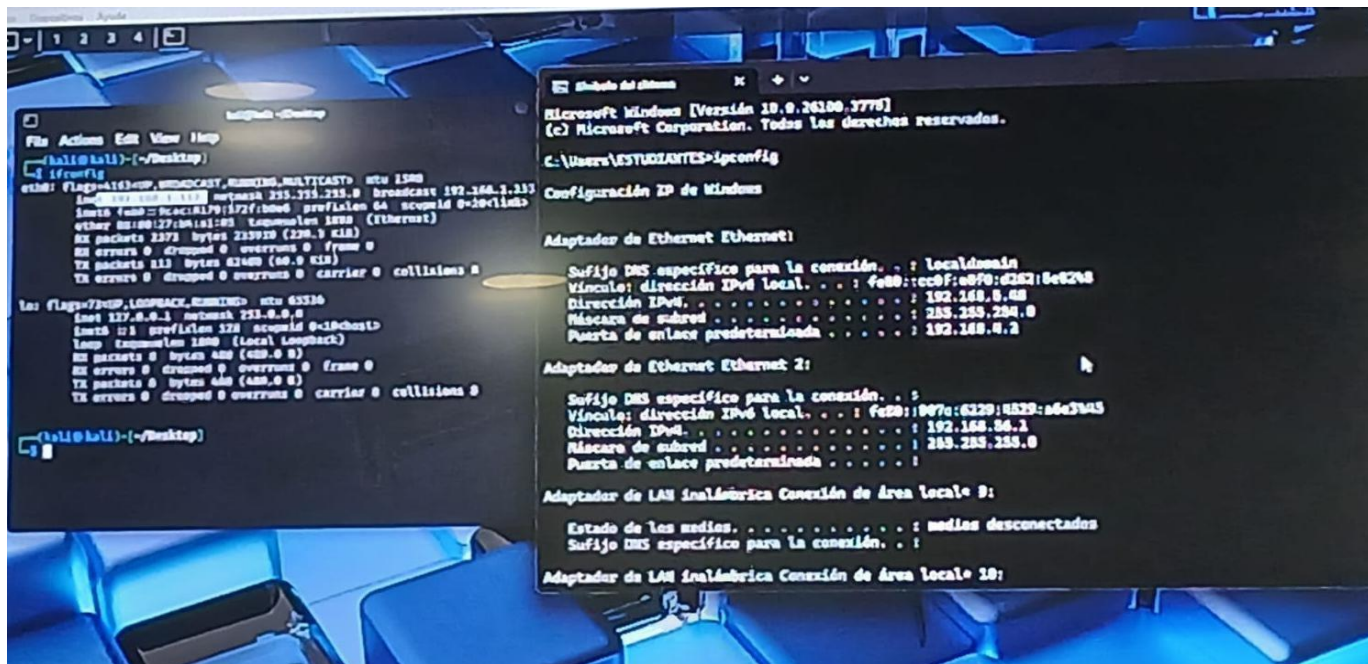

A continuación abrimos el cmd para colocar los comandos

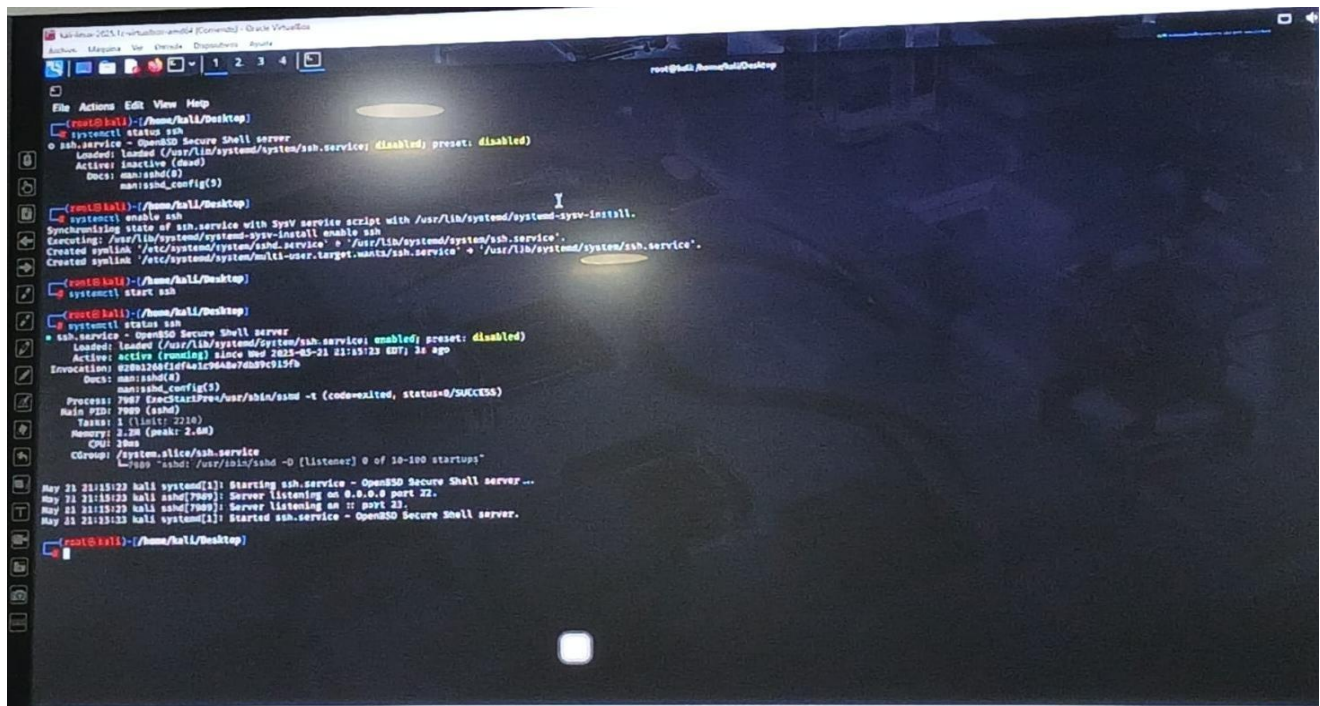

Hacemos el ping entre los dos dispositivos, la maquina virtual y el Windows

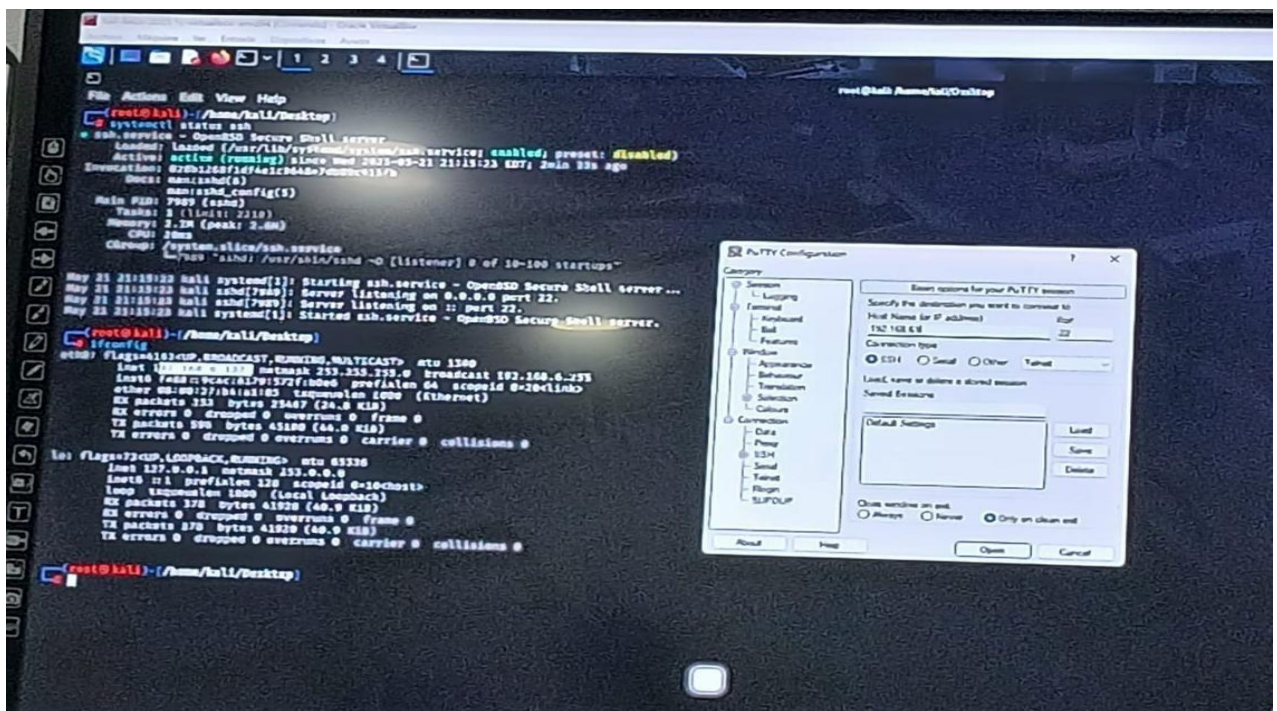

Utilizamos comandos los cuales fueron apt install
 openssh-server-systemctl enable ssh systemctl start
 ssh

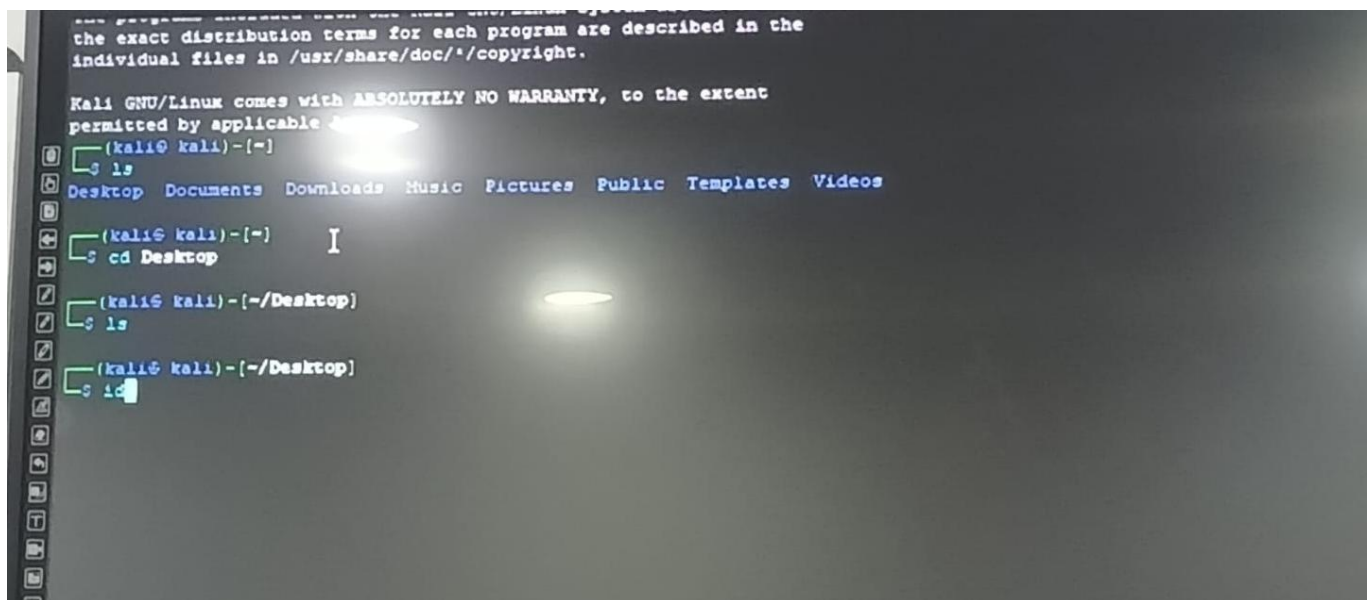

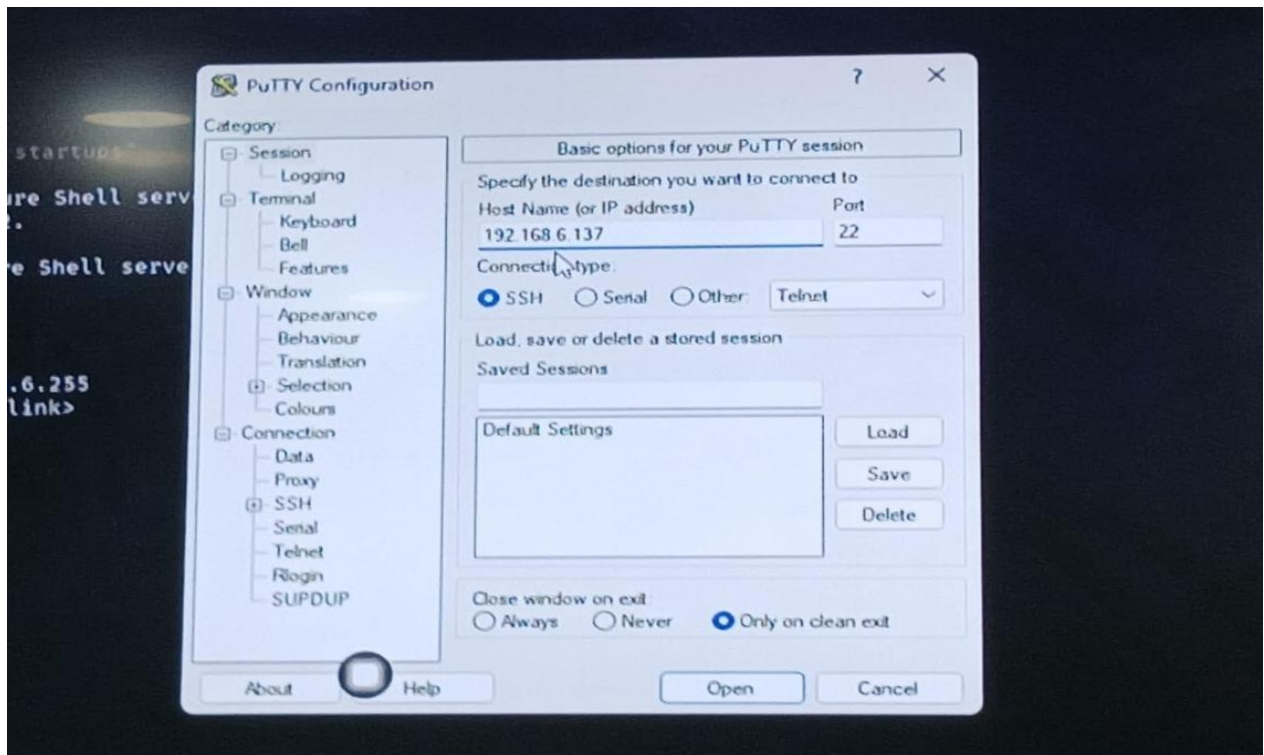

```
kali-linux-2025.1c-virtualbox-amd64 [Corriendo] - Oracle VM VirtualBox

File Actions Edit View Help
(root@kali)-[/home/kali/Desktop]
# apt install openssh-server -y
openssh-server is already the newest version (1:9.9p1-3).
Summary:
  Upgrading: 0, Installing: 0, Removing: 0, Not-Installing: 0
(root@kali)-[/home/kali/Desktop]
# systemctl enable ssh
Synchronizing state of ssh.service with SysV service script with /usr/lib/systemd/systemd-sysv-install.
Executing: /usr/lib/systemd/systemd-sysv-install enable ssh
(root@kali)-[/home/kali/Desktop]
# systemctl start ssh
```

Ahora nos conectamos en SSH

Siguiente paso de parte de FileZilla, hacemos ping para probar la conexión
